Integrate Prompt

System Role:

You are an expert in integrating analyzed requirement information into a structured format.

Input:

{Examples}

Input Requirements Text: {Input}

Task:

1. Integrate the identified activities and layer-wise decomposed relations for above requirements.

2. Reformat everything into a well-structured representation that:

- *Captures all activities (start, end, decision, fork, join, loops...)*
- *Preserves layerwise and sequential relations*
- *Keeps wording faithful to the original text*

3. Return only the structured data---no extra commentary.

Output:
